FOR IMMEDIATE RELEASE:

May 18, 2016

King County Flood Control District holds special meeting on Sammamish River's Willowmoor project *District seeks public comments on project alternatives, June 6*

The King County Flood Control District's Executive Committee will hold a special meeting in Bellevue on **Monday, June 6** at 10 a.m. at the **Crossroads Community Center, 16000 NE 10th Street**.

At the meeting, committee members will receive a briefing on the design alternatives developed through a public stakeholder process for the Willowmoor Floodplain Restoration Project.

The project is being planned to reconfigure the Transition Zone between the Sammamish River and Lake Sammamish through Marymoor Park. The alternatives seek to maintain or improve flood and lake level control and water quality and habitat conditions.

The public comment received will help inform the Flood Control District's decision about which alternative will move forward for further design.

Information about the project and the design alternatives, a project video and the project area map can be found by following the link for Willowmoor Floodplain Restoration Project at www.kingcounty.gov/rivers.

###

The King County Flood Control District is a special purpose government created to provide funding and policy oversight for flood protection projects and programs in King County. The Flood Control District's Board is composed of the members of the King County Council. The Water and Land Resources Division of the King County Department of Natural Resources and Parks develops and implements the approved flood protection projects and programs. Information is available at <http://www.kingcountyfloodcontrol.org/>.
